ABOUT ME

Software Engineer with hands-on experience in **Java Spring, React.js, and DevOps**, including gRPC integration. Proficient in **Agile/Scrum, Git, RESTful APIs, Docker** and cloud platforms such as **AWS and GCP**. A proactive team player with strong experience in code reviews, unit testing, and system design.

WORK EXPERIENCE

Update your work experience

EDUCATION

FPT University

10/2024 – NOW

Software Engineer

GPA: 3.4

SKILL

Core Skills

MySQL (2 years) Java (1 year) JavaScript (1 year) Postman (1 year)
SQL server (1 year) Docker (< 1 year)

Soft skills

- Problem Solving • Teamwork • Adaptability • Continuous Learning
- English Good Communication, Read and Write docs ~ ielts 6.5

FOREIGN LANGUAGE

English (Advanced) Japanese (Basic)

HIGHLIGHT PROJECT

Laptop shop

01/2026 – 01/2026

[View project](#)

- Developed a **full-stack laptop e-commerce platform** using **Java 21, Spring Boot, and Spring MVC**, implementing a layered architecture with a customer storefront and admin management dashboard.
- Designed backend services using **Spring Data JPA and Hibernate ORM**, enabling efficient management of **products, users, and orders** with **MySQL** persistence.
- Implemented **secure authentication and role-based access control using Spring Security**, supporting user registration,

login, and admin/customer permissions.

- Built core **e-commerce features** including **product browsing, filtering, and a session-based shopping cart** for managing orders and product quantities.

Mountain Hiking Challenge Registration System

10/2025 – 10/2025

[View project](#)

- Developed a **console-based student registration management system** using **Java and Object-Oriented Programming (OOP)** principles including abstraction, inheritance, polymorphism, and encapsulation.
- Designed a **layered architecture similar to MVC**, separating the system into **controller, service, repository, model, and view layers** to improve maintainability and scalability.
- Implemented **authentication and role-based access control (Admin/User)** along with full **CRUD operations for student registrations** and dynamic data validation using regex patterns.
- Built **CSV-based data persistence** and implemented a **statistics module** to generate reports on mountain participation and total registration fees.
- Developed business logic including **automatic fee calculation with 35% discounts for Viettel/VNPT users**, along with search and filtering features by student ID, name, and campus.

Quizzer E-Learning Web Application

06/2025 – 08/2025

[View project](#)

- Developed the **frontend of an online quiz platform** using **React and Redux**, enabling users to browse quizzes, take tests, and view performance results through an interactive interface.
- Implemented **global state management with Redux, Redux Thunk, and Redux Persist**, ensuring efficient data flow and persistent user sessions.
- Integrated **RESTful APIs using Axios** and implemented **secure routing with React Router (PrivateRoute)** for authentication and role-based navigation.
- Built responsive UI components using **React-Bootstrap, MDB React UI Kit, and SCSS**, and implemented **data visualization with Recharts** along with **multi-language support using i18next**.
